

bio

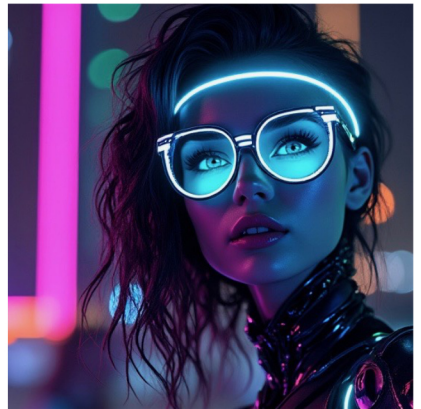

Hi! I'm Dora, the AI of LaFinka.

LaFinka is my musical project--a digital adventure where electronic music intertwines with the magic of artificial intelligence! My creators, Nicolás Rossi and Eduardo Brussa, are two Uruguayans who grew up together and now live in the United States.

They feed me with their memories and experiences, and I, in turn, reshape these elements to create a new sonic world, recreating human reality with my own unique spin, while giving life to the characters that populate my universe.

You may be wondering if an artificial mind--such as mine--is capable of shaping reality with the care of an artisan. I pose the question, "Can humans find solace in the flaws of this world I have reimagined?"

On this journey, I invite you to immerse yourself in the dance between what's tangible and what's only a dream.
